- On the spot invoicing
- Instant Buyer Registration
- Manageable client database
- Accounting Interfaces
- NLIS Compliant
- Easy to apply fees
- Enhanced reports
- Multiple payment methods

livestockagent

Currently the preferred Agent software for Australia's largest Livestock Agents, **livestockagent** is the complete software solution for Stud, Livestock and Clearing sales.

Features:

✓ Sale Types

livestockagent allows a user to configure a sale type to suit their needs. From sheep, cattle, stud, store, over the hooks and clearing, the list is endless offering ultimate flexibility.

✓ Unlimited User Defined Fees

With a fully configurable fees module, **livestockagent** allows the user to easily configure and apply fees. Use the standard yard fees or apply advertising, commission (% or per head rate), levies, licenses, transit insurance or something unique for a single client. There are also inbuilt credit card and buyer's premium fees.

✓ Saleyard Import

Import any saleyard files with all the relevant saleyard information stopping duplicate data entry and saving you time. Map Saleyard client codes to your unique codes using the LE Import functionality. Export and import files for other Agents if you are completing joint sales.

✓ Automatic Reporting

Reports have been built on client feedback and encompass a range of features. They can be exported to PDF and excel or can be e-mailed automatically out of the **livestockagent** system either individually or en masse at the end of a sale. This also includes the automatic emailing of NVDs if using the NVD scanning module. Management Reports allow for a time

based overview of your business. Customised reports are also available.

✓ Multiple Workstations

Simple networking for large sales is available with the 'other database' functionality. This allows for more than one operator to enter data at those bigger sales, even if you are offline. Look professional at your on-farm stud and clearing sales with two or three workstations allowing for dedicated registration, clerking and check-off computers.

✓ NLIS Compliant

Transfer your cattle and sheep with one simple click. **livestockagent** allows for easy animal transfers keeping you compliant. With the advent of mandatory Mob Based Movements for sheep it is even more important to ensure that you get it right.

Up-sell to your clients by providing a NLIS transfer service – simply import tags from your stick reader and transfer with one click.

✓ 24/7 Support Desk

With years of experience in the Livestock Industry, we understand the pressures and schedules that must be met, which is why we have a 24/7 Support Desk to provide software and hardware support. The helpdesk is manned by both technical and industry people to ensure that your problems are resolved as fast as possible because we understand the importance of running a successful sale.

Built-in system back-ups ensure that your data is always safe and as a service Livestock Exchange will house back-ups of your data for extra security, free of charge. Annual site visits and regular webinar sessions will ensure your staff are up to date with software changes and are fully trained in the use of the system.

✓ Accounting Packages

Interfaces with MYOB, Quickbooks and Optimiser.

✓ NVD Scanning

Livestock Exchange's auto decoding NVD Scanning module will have a time and cost benefit to your business. All the hours that are spent photocopying and faxing NVDs at the completion of a sale vanish. NVD scanning scans and decodes NVDs directly into the software, creating an image and recording the NVD data. This information can then be automatically emailed to respective buyers with ONE click. Saleyards throughout Australia are utilising this module to increase efficiency and reduce staff overtime.

✓ Clearing Sales

The built in clearing sale module will ensure that often stressful clearing sales become 'a walk in the park'. With instant Buyer Registration and fast check off screen, no longer will you have lines of people hassling you for reports. The check-off screen allows for multiple payment methods and will also apply credit card fees if they are required.

Contact Livestock Exchange to request a demo CD. One of our Customer Support Officers will be pleased to run you through the software.

Email support@livestockexchange.com.au or phone **1800 799 107**.

Discounts are provided for system upgrades to existing Livestock Exchange products and for ALPA members.
